REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

McCormick et al., U.S. Patent No. 6,351,796, has taught selectively performing writes to a higher level cache. There is no teaching in McCormick of first and second call/return stacks, as claimed.

In general, the prior art of record has not taught, either individually or in combination, a first concept of a first call/return stack for pushing on return addresses associated with respective call instructions and for popping a return address in response to fetching a cache line predicted to include a return instruction, where the return address is the top return address of multiple addresses simultaneously stored on the stack, and where the multiple addresses are pushed onto the stack prior to decoding the corresponding call instructions, coupled with a second concept of a second call/return stack to provide a second return address in response to decoding the return instruction, coupled with the remaining claim limitations.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
